

Message to WHAW members

from Torako Yui, chairperson of Japanese Homoeopathic Medical Association (JPHMA)

2011

April

Torako Yui, chairperson of JPHMA, visited devastated area in Sendai on 1 April 2011 just 20 days after the Great East Japan Earthquake on 11 March 2011.

Members in Sendai were waiting for Ms Yui

Sprinkled remedies over for the purification of the soil and prayed for the repose of souls

Charity lecture in Fukushima on 1 April 2011

'I cannot cry as my emotion is numbed.
There were so many houses around here.
But all of them were collapsed.
Just like ravages from a war
It became mounds of rubbles.
Lives of our fellows.
Return to heaven.'
Ms Yui sprinkled remedies, praying the victims were raised to the skies.

Free homoeopathy consultation by JPHMA members to people in affected area.

July

Rubbles' collection place in Rikuzen-Takada city. It is about 5 meter high.

On 20 July 2011, Ms Yui visited 150 temporary houses in Taro-cho in Iwate, where 450 people were living and gave a lecture of homoeopathy.

Trumpet Creeper (Campsis radicans) beautifully bloomed in Shimonuma area - a symbol of victims'souls

2012

Charity seminar in Fukushima on 11 March 2012. The banner is written 'We love our town! You shall not do self-abasement, Fukushima.' The audience was provided fresh vegetables without being used any pesticides or chemical fertilizer from natural farm, Nippon TOYOUKE Natural Farming Co. Ltd, which Ms Yui is the Managing Director.

2013

On 16 Jan 2013, Ms Yui visited Peach garden in Fukushima, where they are using 'Active Plant'. This 'Active Plant' was developed by Ms Yui, made from 5 year fermented 79 kinds of plants and fruits, herbal tinctures which contain a lot of minerals, 8 kinds of radiation homeopathic remedies and a homeopathic remedy made from soil near to Fukushima nuclear power plant. It can expect to propagate soil bacterium and improve radiation contaminated soil by spreading 'Active Plant'.

Peaches from the left Peach garden were sent in the summer of the disaster year 2011. The garden used the 'Active Plant' and no radiation was detected. Ms Yui said 'I ate them with ease. In addition, they were delicious.'

Meeting with people in Fukushima to interview about their current situation on 18 Jan 2013.

A baby with liquid form homeopathic remedy.

On 15 Jan 2013, Ms Yui visited Minami Sanriku-cho again. This picture was taken in front of the building safety control centre of Minami Sanriku town hall

Just after the Great East Japan Earthquake, all utilities were stopped. What they relied on in a dark without electricity was continued encouraging messages to their mobile telephones from Ms Yui and homeopathic remedy home kit. Be prepared and have no regrets.

The World takes notice of revitalization in FUKUSHIMA.

FUKUSHIMA is a birthplace of aikido (art of weaponless self-defense). The motto of aikido is blending with the motion of the attacker and redirecting the force of the attack.

Sales of agricultural products in FUKUSHIMA got thrown off the market due to the earthquake with tsunami on 11 March 2011 (the Great East Japan Earthquake) and the radiation leaks afterward. Indeed, Japanese products were rejected to be exported for a period of time.

As a part of WHAW event this year, I am going to give a lecture from FUKUSHIMA on 9 March, almost 2 years have passed after the disaster. I will present how FUKUSHIMA has been overcome their hardships from the disaster and interview results of their real voices about this disaster, then disseminate it to the world.

I would like you in the world to share their experiences and prepare for the possibility of disasters in your country.

The most important thing is that the source of fear is not radiation or tsunami, but is within our own minds. When I interviewed people in FUKUSHIMA in January this year, I could get a wonderful result which many people there took homoeopathic remedies and overcame from the fear, then are now living in FUKUSHIMA in a lighthearted manner.

It will be a real pleasure for me if you could send a big yell to FUKUSHIMA who received such hardships, overcame such a serious disaster and regained their bright town.

I would like to introduce a part of 'The FUKUSHIMA Declaration' by Mr Yuhei Sato, Governor of FUKUSHIMA Prefecture. (<http://www.pref.fukushima.jp/311ffc/311massage.html>)

Humankind has never before experienced this type of disaster, a disaster where the natural catastrophes of an earthquake and tsunami were followed by a nuclear power accident which in turn caused damage to an area's reputation. We must reflect earnestly on why such a multifaceted disaster like this happened.

- Were we sufficiently prepared for the threats posed by nature?
- Had we overestimated science and technology?
- Had we squarely faced the difficulty of controlling nuclear power?

In these questions lie important lessons for the future.

We will engrave once again on our hearts respect for the awesome power of nature and not place excessive trust in science and technology. We will promote the creation of a society where all people can enjoy peace of mind.

Moreover, we will call for all nuclear power stations in the prefecture to be shut down so that an accident like this never happens again. FUKUSHIMA aims to create a society that enjoys sustainable development by promoting renewable energy and not depending on nuclear power.

Today the eyes of the entire world are on FUKUSHIMA. Through our journey of revitalization, we will show the world a new kind of society – one that balances community development and global environmental conservation. We will demonstrate the importance of mutual support among local residents and promotion of regional culture and pride.

The road that FUKUSHIMA has chosen is not an easy one by any means, but the people of the prefecture have already risen to their feet and started walking the path with their eyes set on the future. Joining our hearts together as one, we will face the challenges ahead.

Today on this first anniversary of the Great East Japan Earthquake, I make this FUKUSHIMA Declaration to the people of the world:

- We will create once again a beautiful FUKUSHIMA.
- We will build a dynamic and vibrant FUKUSHIMA.
- We will show the world and pass down to future generations FUKUSHIMA's revitalization process.

March 11, 2012

Yuhei Sato

Governor

FUKUSHIMA Prefecture

My lecture in FUKUSHIMA this year is titled 'A precious thing FUKUSHIMA could only have known from overcoming the disaster.' Although many people were killed by this disaster, survivors are still living their lives to the fullest in spite of the sufferings.

Here is to FUKUSHIMA's future! All the best to FUKUSHIMA!

May all be blessed with the benefit of homoeopathy!

Be grateful for all of creation, the existence of universe itself.

Wishing all of you enjoy living the gift of life!

Torako Yui, chairperson of JPHMA
